

ToDo Application Testing Document:

Automation can be done to the following areas part of this application:

1. Check the clicking on Remove button will remove the task from the list.
2. Selecting the checkbox for Done and Public can be done through automation.
3. We can maximum how many task can be displayed in the table on first page and if there are more tasks and some displays in the second page, navigating to second page can be done through automation.
4. Check the clicking on Remove button on sub task page will remove the sub task from the list.
5. Selecting the checkbox for Done can be done through automation.
6. Checking all the non editable heading is according to requirement.

Testing Techniques:

1. We can have some test cases as part of regression test cases.
2. We can do smoke test on the main functionality of the app.
